Please do not disrupt the services that I, the taxpayer, elect to purchase from XM Radio. I do not listen to AM or FM radio due to the extremely poor quality of their services. Those bands do not provide what the consumer wants to hear but instead abuses the airwaves to provide extreme commercialism and to sell products in an offense way that has nothing to do with music. If XM radio wishes to provide traffic and weather so that we are not exposed to the crap on AM and FM I am behind them 100%. No wonder they want to stop these services, because their quality is so poor! Freedom of the airwaves is what this country is founded on. Let the Americans decide what they want to hear, not some poll by the syndicated Companies of AM / FM.

Respectfully,
Scott Houston
